\* Compatibility with models and/or firmware versions other than those listed above is not guaranteed and compatibility issues may exist when using a Pioneer Navigation unit to control the iPod (i.e., USB control). If a compatibility issue is found to exist, the iPod can alternatively be connected using the AUX Input (but without any USB control over the iPod). The list of iPod models not compatible with USB control includes (but is not limited to) the following:

- > iPod (1G, 2G, 3G, 4G)
- > iPod Photo
- > iPod Mini (1G, 2G)
- > iPod Shuffle

iPod/iPhone control requires optional CD-IU50 cable
